Note.—Council meets daily during the annual session. Watch bulletin board for hours during which film and other demonstrations will be given in the Scientific Exhibits Section.

Utilize every opportunity to visit the commercial and technical exhibits.

I—GENERAL MEETINGS

All General Meetings will be held in the Auditorium, on the ground floor, Hotel Del Monte

First General Meeting

Monday, May 1, 10 a. m.

Address of Welcome—Walter P. Farr, M.D., President of the Monterey County Medical Society.

Address of President—William W. Roblee, M.D., Riverside, President, California Medical Association.

California Physicians' Service—T. Henshaw Kelly, M.D., San Francisco, Chairman of the Executive Committee, California Physicians' Service.

Medicine and Surgery Under the California Physicians' Service—Morton R. Gibbons, Sr., M.D., San Francisco, Medical Director of the California Physicians' Service.

Diaphragmatic Hernia—Stuart W. Harrington, M.D., Rochester, Minnesota, Professor of Surgery, University of Minnesota Graduate School, Rochester, Minnesota.

Second General Meeting

Tuesday, May 2, 11:15 a. m.

President William W. Roblee, Presiding
 William H. Barrow, Director

Clinical-Pathological Conference—Conducted by Chester S. Keefer, M.D., Associate Professor of Medicine, Harvard Medical School, Boston; William Dock, M.D., Professor of Pathology, Stanford Medical School, San Francisco; and Jesse Carr, M.D., University of California Hospital, San Francisco.

Note.—Protocols of the cases under discussion, with complete clinical histories and laboratory findings, will be distributed. These case histories will be discussed by the guest speaker and differential diagnoses presented, following which the pathological findings will be presented and discussed.

The three cases may be summarized briefly as follows:

1. Febrile illness of two years' duration; appendectomy and nephropexy without relief of abdominal pain.
2. Severe hypertension noted after pneumonia in a man whose pressure was normal a few months before. Postoperative complications following splanchnic nerve resection.
3. Twenty-five years of "peptic ulcer" history followed by appearance of abdominal masses, cough, and hemoptysis.

Third General Meeting†

Wednesday, May 3, 11:15 a. m.

Pending State Legislation—Junius B. Harris, M.D., Sacramento, Chairman of the Committee on Public Policy and Legislation.

On Periodic Payment Medical Service Plans—Lowell S. Goin, M.D., Los Angeles, Vice-President of the Board of Trustees, California Physicians' Service.

† The third general session will immediately follow the paper given in the Section on Medicine, on "The Practical Interpretation of Laboratory Tests in the Diagnosis of Infectious Disease," by Chester S. Keefer, M.D., Associate Professor of Medicine, Harvard Medical School, Boston.
